

EXPERTS IN PATIENT HANDLING SOLUTIONS

# BED LOOPS

This guide covers all products with the prefix BL in the product code.

People who struggle to turn in bed can use these **Bed Loops** to securely reposition themselves and safely move to the edge of the bed. Supplied in pairs for use on either side of the bed

## USER INSTRUCTIONS

	<h1>1</h1> <p>Thread the large loop up through the frame on the side of the bed, at the position so it is parallel to where the person's arms will be. Hold it in an 'O' shape.</p>
<p>Thread the rest of the <b>Bed Loop</b> through this 'O' and pull tight.</p>	<h1>2</h1>
	<h1>3</h1> <p>The <b>Bed Loop</b> is then securely held and ready to be used.</p>
<p>They can be placed anywhere on the bed frame to help a patient feel more secure when moving themselves around or sitting up.</p>	<h1>4</h1>

## FABRIC CONTENT

100% Polypropylene

## STORAGE AND HANDLING

- Store in a clean dry environment that is not subject to excessive heat.
- Keep away from sunlight.
- Store flat and avoid placing heavy objects on top of the product.

## WARNINGS AND PRECAUTIONS

- Do not leave or drop on the floor; it is a trip hazard.
- Inspect product before use for signs of damage or tears.

## CLEANING INSTRUCTIONS

- Wash as per laundry instructions.
- Can be wiped clean, between use with the same patient, with natural water and detergent or wipes that don't contain alcohol, solvents, bleaching or abrasive agents.
- Cleaning materials used should be patient safe and biodegradable.

## DISPOSAL INSTRUCTIONS

- Non-recyclable.
- Dispose of as clinical waste if it has been used by an infectious person.
- Otherwise dispose of through normal waste management.

Wash at 30-74°C. Tumble dry on low heat. Do not iron.  
Do not use bleach. Do not use fabric conditioner

## HOSPITAL DIRECT (HD) ADDITIONAL SYMBOLS

At HD we understand that not everyone is familiar with all equipment, so to help therapists and healthcare professionals in assessing a product's suitability for a client, we have included two assessment tools, Functional Independence Measure (FIM) and Easy Guide Symbols. These will enable the healthcare professional to assess their client and decide whether or not a product will help the person based on their level of dependence and functional ability.

### FUNCTIONAL INDEPENDENCE MEASURE (FIM) ASSESSMENT

Our FIM assessment guide for each product will help you decide the suitability of this product for the person's ability and need. Based on the standard criteria from Level 6 where the person can use the product unaided and unsupervised to Level 1 where all the assistance is provided by the carer and the client can do nothing, this guide is easy, quick and simple to use to check suitability against ability and circumstance.

#### FIM LEVELS QUICK GUIDE. SUBJECT VS CARER HELP

### EASY GUIDE SYMBOLS

We use four symbols to indicate where a product is suitable and safe for the person to use unassisted, with a single carer or with multiple carers. These symbols indicate the minimum recommendation.

HD has a policy of continuous development and, as such, reserves the right to alter specifications (including measurements, materials and colours) without prior notice. If any serious incident has occurred in relation to the device it should be reported to the manufacturer and the competent authority in which the user and/or patient is established.
